

UMM Course Descriptions for Summer 2010

Session 1

Semester begins May 24

Exceptions noted in red text

CSEM 305 ASYN Computer Applications for Professionals

ONLINE

May 24 - July 2

A review of concepts combined with the practical application of software helps students gain an understanding of the Internet, spreadsheets and methods of electronic presentations. Use of the computer applications to enhance professional productivity is an important aspect of this course. Demonstration software packages may be available. Online computer use required. Computers are available at locations statewide. Prerequisite: Junior standing or permission of the instructor. Asst. Prof. Andrea Ednie

EDUM 320 ASYN Methods of Teaching a Foreign Language

ONLINE

May 24 - July 2

This course is designed to introduce prospective world language teachers to methodology, approach and technique of teaching a foreign language. Methods and techniques for instruction in reading, listening, speaking and writing will be reviewed and practiced. Use of digital technology will be explored for relevance in the target language classroom. The course also aims to examine basic principles underlying the design of the teaching/learning process. Particular attention will be paid to the development of student interest and the importance of pleasure reading in the language as a fundamental piece of instruction beginning with a student's first foreign language experience. Self-evaluation and peer critique will be done. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: Junior level standing or permission of the Instructor. CR 3 Lecturer Nona Famous.

ENGM 101 ASYN English Composition

ONLINE

May 24 - July 23

A course to help students improve their skill in expository, analytical, and persuasive writing. Students will gain introductory research skills as they learn to write in relationship to other texts. Reading and grammatical skills are emphasized, so that students will learn to build solid prose that will be the foundation of their academic career. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR3. Assoc. Prof. Marcus LiBrizzi

ENGM 210 ASYN Beginning Creative Writing

ONLINE

May 24 - July 9

An introductory writing course that focuses on the knowledge, attitudes, and techniques essential to successful creative writing. It is open to writers and aspiring writers of various levels of ability providing course prerequisites have been met. Genres treated include poetry, fiction, and creative nonfiction. While much of the course consists of a workshop format, lectures and class discussions cover such topics as sentence effectiveness, writer's block, dynamics of language, metaphor, meter, characterization, plotting, dialogue, narrative point of view, scene construction, revision, and publication. For further information please write to necastro@maine.edu. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101 with a grade of B- or better, or permission of instructor. Offered pass/fail or for a letter grade at the option of the instructor. CR 3. Prof. Gerard NeCastro

HTYM 301 ASYN **Maine and Local History**

ONLINE
May 24 - July 2

A chronological survey of Maine's economic, cultural, and political life from prehistory to the present. Themes include the impact of national developments on Maine, the role of location and physical environment in shaping life here, and sources of internal tension and division. Independent research on local history is a major component of the course. Prerequisite: HTY 115 and 116, or permission of instructor. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101 Composition. CR 3. Assoc. Prof. Kay Kimball

MANM 318 ASYN **Human Behavior in Organizations**

ONLINE
May 24 - July 2

The interaction of formal organization structure with the human intellect and personality, which includes studying cultural diversity as it pertains to human behavior in organizations. The course is designed to enable the student to understand and examine important characteristics of an organization. The concepts enable the student to analyze, understand, predict and influence human behavior in that organization, thus creating a personal tool that will help increase personal effectiveness and achievement. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Instructor Robert Tropea

PHIM 201 ASYN **Ethics**

ONLINE
May 24 - July 2

An examination of the task of ethics to elucidate the concept of the good life; to investigate ideas of obligation, duty, and responsibility; and to decide what ought to be done. The student explores traditional themes of right conduct. Through readings and discussions, these themes are applied to relevant contemporary issues such as war and terrorism, the connections between business and environmental ethics, sexuality, suicide and euthanasia and drug use. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENGM 101 Composition, equivalent, or permission of instructor. CR 3. Asst. Prof. Chris Crittenden

PSYM 110 ASYN **Introduction to Psychology**

ONLINE
May 24 - July 2

An introduction to the scientific study of behavior including a survey of all the major areas of inquiry pursued by psychologists--history, methods, physiological aspects, perception, learning, memory, cognition, emotion, motivation, consciousness, personality, abnormal behavior and therapies, and social processes. Unless otherwise noted, this course is a prerequisite to all other psychology courses. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Assoc. Prof. Lois-Ann Kuntz

PSYM 230 ASYN **Abnormal Psychology**

ONLINE
May 24 - July 2

A course designed to provide an overview of the area of abnormal psychology and to introduce the student to different theoretical models, classifications, origins, and treatments of abnormal behavior. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: PSYM 110 Intro to Psychology or equivalent, and Sophomore standing or permission of instructor. CR 3. Asst. Prof. Frank Lane

PSYM 314 ASYN **Applied Psychology**

ONLINE
May 24 - July 2

The purpose of this course is to allow the student to understand the full range of activities professional psychologists engage in within their careers. We will discuss major professional areas like clinical and counseling psychology but also school and educational psychology, industrial and organizational psychology, sports psychology, consumer psychology, environmental psychology, forensic psychology and other fields. A great course to take if you wish to understand the profession of psychology outside of university teaching. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: PSY 110 Intro to Psychology or permission of instructor. CR 3. Prof. Dean Frost

PSYM 335 ASYN **Forensic & Criminal Psychology**

ONLINE
May 24 - July 2

Forensic psychology is the application of psychological principles and techniques within a legal setting. This course will focus on ways in which psychologists work within legal contexts and how psychological techniques inform civil and criminal legal proceedings. Topics include: the role of expert witnesses, determination of competency to stand trial, informing legal decision on child custody, assessment of malingering, determination of civil competencies, assessing offenders, use of interrogation techniques and ethical issues that arise in this field. This course is appropriate for students interested in careers in criminal justice, as well as students who plan to work in health and human services with clients who are court-involved or adjudicated. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisites: PSYM 110 Introduction to Psychology and ENGM 101 English Composition, or equivalents, or permission of instructor. CR 3. Asst. Prof. Meghan Duff

REMM 225 ASYN **Leadership and Group Dynamics**

ONLINE
May 24 - July 2

The study of leadership theory and group dynamics is the primary focus of this course. Human nature and the motivation of the individual are examined in order to better understand individuals as members of groups. Face-to-face leadership techniques are put into practice as students lead activities as part of a class-sponsored special event and as they simulate management-level interaction and problem solving. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: 24 cr and ENG 101. CR 3 Asst. Prof. Andrea Ednie

SEDM 320 ASYN **Special Education Law**

ONLINE
May 24 - July 2

Students will study the American legal system and procedural due process in order to develop a framework for addressing legal issues relating to students with disabilities. The six principles of the Individuals with Disabilities Education Act will be covered as well as providing for a free appropriate public education, identifying and assessing students, educating in the least restrictive environment, providing related services, addressing discipline issues, and finding solutions to challenging situations facing students with disabilities. The role of the federal, state, and local government in special education issues will also be covered with special emphasis on case and regulatory law, including Maine regulations. This course satisfies the State of Maine Teacher of Students with Disabilities (282) endorsement. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: SED 310 Dimensions of Exceptionality, equivalent, or permission of the instructor. CR 3. Lecturer Joe Cassidy

SEDM 340 **ASYN** **Communication & Collaboration in Special Education**

ONLINE
May 24 - July 2

This course provides the special educator with techniques and skills for effective communication, consultation and collaboration with families, general educators, and other professionals. The main emphasis of the course is on understanding collaborative consultation as a process that enables people with diverse expertise to work together to generate solutions for educating students with special needs. The course will increase awareness of the framework and rationale for collaboration, the facilitating factors involved, and strategies for implementation. This course satisfies the State of Maine Teacher of Students with Disabilities (282) endorsement. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: SEDM 310 Dimensions of Exceptionality in the Classroom, equivalent, or permission of instructor. CR 3. Lecturer Kenny Bourgoin

SEDM 345 **ASYN** **Behavior Strategies & Social Skill Development for Students with Disabilities**

ONLINE
May 24 - July 2

This course provides instruction in a variety of behavior strategies, including the development of social skills. Emphasis is placed on students with disabilities in a broad range of educational environments. Proactive systems of behavior intervention, management and modification are examined to target specific behaviors while providing an environment that encourages inclusion, self-advocacy and increased independence. Methods of data collection and analysis are explored throughout this course. This course satisfies the State of Maine Teacher of Students with Disabilities (282) endorsement. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: SED 310 Dimensions of Exceptionality in the classroom, equivalent, or permission of the instructor. CR 3. Lecturer Heather Ball

SOCM 114 **ASYN** **Introduction to Sociology**

ONLINE
May 24 - July 2

The study of the concepts, theories and research findings of the discipline of sociology. Stressed are the following concepts, institutions and topics: culture, society, socialization, the family, social stratification, intergroup relations, deviance, demography, collective behavior, popular culture, social movements, and social change. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Lecturer Kenneth Miller

SOCM 310 **ASYN** **Childhood & Society**

ONLINE
May 24 - July 2

The course is intended to provide an in-depth look at childhood throughout history and in contemporary America. The course is roughly divided into two parts. First the course provides a cross-cultural examination of the idea of childhood with particular reference to the evolution of the idea of childhood in western culture. Second, the course examines childhood and pre-adolescence in the United States at the start of the 21st century. In the latter section, students examine socialization theories as they relate to contemporary American children's peer cultures and American culture generally. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: SOCM 114 Intro to Sociology or equivalent or permission of instructor. CR 3. Asst. Prof. Robert Hauhart

SSCM 210 **ASYN** **Human Sexuality**

ONLINE
May 24 - July 2

An interdisciplinary inquiry into the historical, cultural and developmental issues in human sexuality. Current literature and research are reviewed. As this course includes an examination of sexuality, it includes materials that may be deemed explicit or provocative for many. Individual discretion is advised. This course requires a computer with specific multimedia capabilities available at UC Centers. Home students should visit <http://www.learn.maine.edu/crs/multimedia.php> before registering. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101, sophomore standing or permission of instructor. CR 3. Lecturer Alexandria Patel

Session 2
Semester begins July 6

Exceptions noted in red text

ANTM 101 **ASYN** **Cultural Anthropology**

ONLINE
July 6-Aug 13

A comparative study of contemporary cultures and institutions with particular attention to primitive and peasant societies. Emphasized are such topics as human evolution and race; pre-scientific writings and ethnology; the concept of culture; language and perception; economics and technology; marriage, the family and kinship; associations, castes and classes; political organization and warfare; religion and magic; folklore and the arts; culture and personality; American culture; cross-cultural contact; and cultural change. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Asst. Prof. Daniel Qualls

CMYM 101 **CV** **Intro to Community Studies**

TU/TH 10-12:45
July 6-Aug 13

Community is one of the fundamental concepts and units of study in the social sciences. This course will be primarily concerned with communities of place within the United States, although many of the conceptual and methodological approaches discussed could be applied to other forms of community and communities in other places. The course will survey the development of community study as a scientific endeavor, the conceptual tools employed in the study of communities of place, and common methodologies used to study a community. Class sessions will involve lectures, student project work, media presentations, and perhaps guest lectures from accomplished community researchers. Readings will include excerpts from classic community studies, contemporary journal articles and/or a community study or community development text book, and an in-depth examination of a contemporary, empirical community study research project. Course assignments will involve reading and writing tasks and a hands-on project that will focus on the production of a local community profile. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Asst. Prof. James Moriera

EDUM 213 **ASYN** **Teaching, Learning, and Technology**

ONLINE
July 6-Aug 13

A course to provide students with an understanding of the ways technology can be used in school settings and to develop the skills to incorporate its use in a variety of educational tasks. The course includes an introduction to word processing, database, spreadsheets, and the Internet. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Asst. Prof. Daniel Qualls

ENGM 117 ASYN Intro to Literary and Cultural Studies

ONLINE
July 6-July 27

An introduction to the goals, methods, and implications of literary analysis in the 21st century. The underlying assumption is that there is no such thing as a generic or standard reading of a literary work; all readings take place in and depend on a critical framework, whether that be explicit or implicit. From this starting point, the course is constructed around several critical approaches. One of these is a formalist approach in which students interpret the literary text on the basis of its formal features and stylistic conventions. Students will then explore other opposing and overlapping critical approaches, including but not limited to, feminist, Marxist, historicist, and psychological. Prerequisite: ENG 101 or permission of instructor. CR3. Assoc. Prof Marcus Librizzi

ENGM 210 ASYN Beginning Creative Writing

ONLINE
July 6-Aug 13

An introductory writing course that focuses on the knowledge, attitudes, and techniques essential to successful creative writing. It is open to writers and aspiring writers of various levels of ability providing course prerequisites have been met. Genres treated include poetry, fiction, and creative nonfiction. While much of the course consists of a workshop format, lectures and class discussions cover such topics as sentence effectiveness, writer's block, dynamics of language, metaphor, meter, characterization, plotting, dialogue, narrative point of view, scene construction, revision, and publication. For further information please write to jdennis@maine.edu. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101 with a grade of B- or better, or permission of instructor. Offered pass/fail or for a letter grade at the option of the instructor. CR 3. Assoc. Prof. John Dennis

ENGM 225 ASYN Writing for Children & Young Adults

ONLINE
July 6-Aug 13

Writing books for children—from lap-sitter to young adult—covers fiction and creative nonfiction, with emphasis on characterization, theme, plot, setting, dialogue, and conflict. Part of the course will focus on what distinguishes writing for children from other forms of creative writing, and the narrowing margin between novels and short stories for young adults and those marketed for an adult audience. Professional tips on subject matter of interest to children, preparation of manuscripts for publication, and possible markets will also be studied. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101 or permission of instructor. CR 3 Asst. Prof. Lynne Hepler

PSYM 219 ASYN Peace Psychology

ONLINE
July 6-Aug 13

This course will help you to (a) broaden your awareness of the etiologies underlying violence, aggression, and conflict, (b) develop a global perspective of social injustices (c) understand how conflicts unfold and how to incorporate peacemaking concepts and theories to resolve conflict and enhance your life, and (d) envision, promote, and sustain strategies for creating peace from both a personal and global perspective. At the conclusion of this course you will create a best practice model for creating a peaceful society. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: PSYM 110 Introduction to Psychology, or equivalent, or permission of instructor. CR3. Instructor Bill Anderson.

PSYM 221 **ASYN** **Health Psychology**

ONLINE
July 6-Aug 13

This course surveys theory and research on the interrelationships of mental processes and behavior with physical health and well-being. Major areas covered include the interface between mind and body; the role of belief systems in engaging in health protective behavior; the influence of stress on the immune system; and the biological, psychological, social and behavioral factors that moderate maintaining health or developing illness, such as individual differences in personality, life-style choice, coping styles, and the availability of social support. Methodological issues in health psychological research are also explored. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: ENG 101 and PSY 110, or permission of instructor. CR3. Asst. Prof. Jordan Litman

PSYM 313 **ASYN** **Counseling Diverse Populations**

ONLINE
July 6-Aug 13

This counseling course is designed to help the student acquire the skills necessary to become a culturally competent mental health or social service practitioner, that is, someone who is sensitive to cultural differences and to their impact on human interactions. The course is based on the fundamental premise that cultural competence is an ongoing and multi-layered process working at personal, interpersonal, and organization-wide levels. Topics to be addressed include skills to increase cultural awareness and understanding, skills to foster effective interpersonal communication and organizational change strategies. Studies will learn to identify and understand culture as it operates on different social levels (class, ethnicity, gender, sexual orientation). Students will also learn to identify the barriers to effective communication and positive relationships including how culture may be a barrier. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: PSY 110, PSY 211, or PSY 213 or permission of instructor. CR3. Asst. Prof. Meghan Duff

SEDM 310 **ASYN** **Dimensions of Exceptionality**

ONLINE
July 6-Aug 13

The purpose of this course is to provide an understanding of the characteristics and needs of individuals with exceptionalities. Students will learn about a range of topics including: the history of the special education movement, the provisions of IDEA and PL 94-142, inclusion, transition, classroom modifications, and instruction. Students will also survey the characteristics of various disabilities, and how they affect individuals and their families. Factors that put students at risk, cultural and linguistic diversity, and giftedness are also explored. This course satisfies the State of Maine Teacher of Students with Disabilities (282) endorsement as well as the “teaching the exceptional student in the regular classroom” requirement for several State of Maine endorsements including: Elementary Teacher, Middle Level Teacher, Secondary Subject Area Teachers, and K-12 specialty areas such as Art, Music, Physical Education, and Health. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: EDU 210 Educational Psychology, equivalent, or permission of the instructor. CR 3. Lecturer Heather Ball

SOCM 114 **ASYN** **Introduction to Sociology**

ONLINE
July 6-Aug 13

The study of the concepts, theories and research findings of the discipline of sociology. Stressed are the following concepts, institutions and topics: culture, society, socialization, the family, social stratification, intergroup relations, deviance, demography, collective behavior, popular culture, social movements, and social change. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Lecturer Pamela Feeney

Session 3

Semester begins May 24

ACCM 201 ASYN **Financial Accounting I**

ONLINE
May 24 - Aug 13

The fundamental principles of accounting as they relate to sole proprietorships. Emphasis is given to developing the technical procedures of journalizing, posting, adjusting entries, closing the books and preparing the financial statements. In addition, students are introduced to notes, inventory, depreciation, controls and payroll. Competency and/or concurrent enrollment in basic reading, writing, and mathematics courses are a prerequisite for all business studies offerings with a prefix of ACC, BUS, MAN, and MAR. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR3. Instructor Rhonda French

ACCM 314 ASYN **QuickBooks Accounting for Entrepreneurs**

ONLINE
May 24 - Aug 13

QuickBooks Accounting for Entrepreneurs will introduce students to QuickBooks accounting software. Students will become familiar with maintaining accounting records and preparing summary financial reports using QuickBooks. The course is also intended to help students learn or review fundamental accounting concepts and principles, enable students to review financial statements from a user perspective, provide students with a means to investigate the underlying source documents that generate most accounting information, and offer students the chance to explore some managerial aspects of accounting by performing financial analyses and comparisons. Prerequisite: ACC 201 or permission of instructor. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR3. Instructor Rhonda French

BUSM 324 ASYN **Labor Relations Management**

ONLINE
May 24 - Aug 13

This course provides an examination of the legal, managerial and economic factors relevant to labor management relations and an in-depth investigation into the character and procedures of arbitration, mediation, conciliation, and fact-finding. Current labor management contracts and implications for labor and management will also be discussed. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Instructor Robert Tropea

BUSM 332 ASYN **Leadership**

ONLINE
May 24 - Aug 13

This course gives the student a thorough introduction to important leadership issues that arise in the world of business, including the analysis of the interests of all the individuals who hold a stake in the outcome of any business dilemma or decision. Students will be encouraged to open their minds to the variety of opinions on leadership and entrepreneurial issues. This is an applied course that combines behavior theory with business practice. The course teaches central concepts and skills in an important area of leadership development. The course will be made more forceful and the impact greater by self-evaluation questionnaires and practical exercises that are used for personal development and class involvement. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: Junior level standing or permission of the Instructor. CR 3. Instructor Robert Tropea

BUSM 420 ASYN **Topics in Bus: Drucker on Corporate Management**

ONLINE

May 24 – Aug 13

The course studies a selection of the early and later works of Peter Drucker. Although Drucker is known as a management and business expert, he is also a moral, political and social philosopher. Drucker's interest in management and business emerged from his attempt to find a moral foundation for industrial society. The course studies Drucker as a moral, political and social philosopher, in the tradition of Plato, Aristotle, Burke and Marx. The course investigates the two questions that motivated Drucker's research. The first question is: How do you construct an industrial society that embodies the key values of western civilization? These are the values of freedom, justice and equality. The second question is: How do you legitimize the power of the ruling class? The managerial class is the new ruling class of industrial society. Drucker, however, believed their power was illegitimate. He concluded that only performance could legitimize their power. Performance is a pragmatic ethical solution to the problem of the legitimacy of the ruling class. His works on management are educational essays that instruct managers on performance. Drucker, like Plato in the Republic, developed an educational program for the ruling class. Unlike Plato, his program educated the ruling class in the art of managing organization. The art of management is the new ruling art of the 20th and 21st centuries.

The course studies the answers that Drucker's gave to the above questions. Those answers changed as the west moved from an industrial to a knowledge society. The course selects the readings that define Drucker's problems and show the evolution of his thought. Online computer use required. Computers are available at locations statewide. Prerequisite: MATM 012 Beginning Algebra or the equivalent, or permission of instructor. <http://www.courses.maine.edu> CR3. Instructor Albert Jacobbe

ENGM 226 ASYN **Summer Reading List**

ONLINE

May 24 – Aug 13

A self-designed, self-paced course that enables students to focus exclusively on reading the literary classics. Students choose their reading from a list of major texts in American, British and world literature. Working with the instructor, students finalize their reading goals, set dates to assess reading retention and learn how to identify social issues and aesthetic features in works of literature. While this course is designed for English majors considering graduate school, the course is open to anyone with a passion for reading the greatest works of all time. Students can take this course up to two times. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Assoc. Prof. Marcus LiBrizzi

GEOM 101 ASYN **Intro to Geography**

ONLINE

May 24 - Aug 13

A course designed to introduce the student to world regional geography by studying developed and developing realms. Also surveyed are topical or systematic fields including geomorphology, climatology, geography of development, and urban, historical, economic, cultural, medical, population, resource and political geography. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> CR 3. Asst. Prof. Andrea Ednie/Lecturer Tora Johnson

MANM 313 ASYN **Managerial Decision Making**

ONLINE

May 24 - Aug 13

This course provides an examination of the issues of decision making including personal style, the external environment and internal political, cultural and ethical forces that affect the decision-making process in organizations. It goes beyond the understanding level of the introductory management courses to the level of application. Students develop both strategic and tactical problem-solving skills using cases and decision-

making formulae. Online computer use required. Computers are available at centers statewide and at sites by appointment.
<http://www.courses.maine.edu> CR 3. Instructor Robert Tropea

PSYM 312 **ASYN** **Theories of Personality**

ONLINE

May 24- Aug 13

A study of the concepts included in psychology's most widely accepted theories of personality such as those proposed by Freud, Horney, Allport, Rogers, and Skinner. Attention is given to related research, personality assessment, and therapies. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: PSY 110 plus 3 additional cr of psychology or sociology; third-year status recommended. CR3. Lecturer Charles Rayner

SSCM 310 **ASYN** **Demography and Human Ecology**

ONLINE

May 24- Aug 13

A course introducing students to the study of human populations (Demography) and their relationships to and with the environment (Human Ecology). Topics covered include the socio-economic determinants of fertility, mortality and migration, carrying capacity, urbanization, and environmental stress. Students are expected to manipulate and analyze demographic data. An environmental policy analysis project synthesizes demography and human ecology. Online computer use required. Computers are available at centers statewide and at sites by appointment. <http://www.courses.maine.edu> Prerequisite: MAT 113 Introduction to Statistics, junior standing, or permission of instructor. (SOC 114 Introduction to Sociology recommended but not required.) CR3Lecturer Tora Johnson
